

/*Create Database "Orders" + SQL Queries */

--1 Create Tables

--Create customer table

```
create table customer(
    customer_id int primary key,
    customer_name varchar(25)
);
```

```
select * from customer;
```

--Create product table

```
create table product(
    product_id int primary key,
    prod_name varchar(40),
    price numeric(5,2) not null,
    last_updt_date timestamp
);
```

```
select * from product;
```

--Create orders table

```
create table orders(
    date timestamp,
    customer_id int,
    product_id int,
    quantity numeric(5,2) not null
);
```

```
select * from orders;
```

--Add primary key to the orders tables

```
alter table orders
add constraint pk_orders primary key (date, customer_id, product_id);
```

--Add foreign key to the orders tables

alter table orders

add constraint fk_orders_customer foreign key (customer_id) references
customer(customer_id);

alter table orders

add constraint fk_orders_product foreign key (product_id) references product(product_id);

--Add 5 records on product table

insert into product (product_id, prod_name, price, last_updt_date) values

(1, 'Purina', 5.99, now()),
(2, 'Specific', 3.99, now()),
(3, 'Hills', 6.50, now()),
(4, 'Virbac', 5.50, now()),
(5, 'Royal Canin', 7, now())

select * from product;

--Add 5 records on customer table

insert into customer (customer_id, customer_name) values

(1, 'Maria'),
(2, 'João'),
(3, 'Ana'),
(4, 'Gisela'),
(5, 'Vanessa');

select * from customer;

--Add 3 records on order table

insert into orders (date, customer_id, product_id, quantity) values

(now(), 2, 3, 5),
(now(), 2, 4, 3),
(now(), 2, 5, 1);

select * from orders;
